## **STRUKTOL® MONTAN WAX OP**

---

LUBRICANT  
PROCESSING ADDITIVE

### **COMPOSITION**

Montanic ester wax.

---

### **TYPICAL PROPERTIES**

### **MONTAN WAX OP**

Appearance	light
Acid Value (mg KOH/g)	7-14
Density (g/cm <sup>3</sup> )	1.01
Dropping Point (°C)	102
Penetrometer Value	1
Solidification Point (°C)	76
Viscosity (@ 120°C)	ca 400
Packaging	55 lb. bag

### **RECOMMENDATIONS FOR APPLICATIONS**

STRUKTOL® Montan Wax OP is an excellent processing additive for PVC. It provides superior plate out properties, wide processing latitude and is ideal for clear applications.

STRUKTOL® Montan Wax OP is also used in solvent-based polishes for binding solvent and increasing gloss.

Primary applications are for calendered goods, injection, and blow molded products.

### **ADDITION LEVELS**

0.1 - 0.5 typically. Please contact technical service at 1-800-327-8649 for more information.
