RE: Effects of Hurricane Harvey

To our valued customers and business partners,

Struktol Company of America continues to monitor the situation in the Gulf region and wish to extend our thoughts and prayers to our customers, suppliers and associates directly affected by this developing disaster. Although we are not currently experiencing any major disruptions of raw material or finished goods supply, we are preparing for what we believe will be a challenging time ahead for our industry.

We are in communication daily with our extensive network of suppliers in an effort to determine the supply situation for our raw materials and packaging. We are also closely monitoring the availability of transportation as we anticipate challenges related to a shortage of drivers and available carriers ultimately affecting delivery of materials. As of now, it is too soon to be able to accurately assess the overall effect on our industry but we are receiving reports that it will be significant. We will continue to provide updates and address specific concerns as efficiently as possible. This is obviously a very dynamic situation with expected changes and updates coming in on a daily basis. Please keep checking our website for product supply related announcements or contact your local sales agent or Struktol representatives for any specific questions related to our products.

Struktol is committed to maintaining as much normalcy as possible and will rely on our global network to support our customers and address your needs. We appreciate your business and thank you for your patience and understanding during this difficult and challenging time.

Sincerely,

The Entire Struktol Company of America Team
